PROFESSIONAL SUMMARY

Results-oriented and innovative Senior Software Engineer with 7+ years of experience. Easily communicates complex technical requirements to non-technical stakeholders. Excellent leadership record of leading development teams in enterprise-wide development projects.

Detail-oriented, organized, and meticulous employee. Works at a fast pace to meet tight deadlines. Enthusiastic team player ready to contribute to company success.

Adaptable Senior Software Engineer talented at providing customized and optimized solutions for all needs. Thrives within tight deadlines by applying agile development strategies. Comfortable overseeing large-scale development teams or independently coding complex projects.

Multi-talented Senior Software Engineer completing simultaneous projects. Willing to jump in to develop "outside the box" solutions. Decisive leader and reliable team builder with a results-focused and driven approach. Detail-oriented, organized, and meticulous employee. Works at fast pace to meet tight deadlines. Enthusiastic team player ready to contribute to company success. Results-oriented and innovative Senior Software Engineer with 7+ years of experience. Easily communicates complex technical requirements to non-technical stakeholders. Excellent leadership record of leading development teams in enterprise-wide development projects.

SKILLS

- Node.Js
- Laravel
- Django
- Next JS
- Nest JS
- PHP
- Python
- Ruby on Rails
- TypeScript
- Javascript
- MERN
- MEAN
- Artificial Intelligence
- Software Architecture
- Technical Analysis
- Solutions Deployment
- AWS
- Digital Ocean
- Third-Party Integration
- Database Design
- Bug Fixes
- Restful API
- Docker
- Kubernetes
- Development Lifecycles
- Microservices Architecture
- Project Leadership
- API development experience
- Analytics
- Web Security
- Object-Oriented Programming
- Code reviews
- SQL
- API Development & Integration
- Amazon Web Services
- Database Management

- GIT
- MySQL
- MongoDB
- Postgres
- Cloud Computing Expertise
- Software Architecture Design
- Advanced Debugging

WORK HISTORY

SENIOR SOFTWARE ENGINEER | 01/2019 to Current
Freelancer

- Developed scalable applications using agile methodologies for timely project delivery.
- Managed multiple projects simultaneously while maintaining strict deadlines and high-quality standards.
- Maintained comprehensive documentation of development work, facilitating knowledge sharing among team members.
- Enhanced software functionality by identifying and resolving complex technical issues.
- Streamlined development workflows to increase team efficiency and reduce time spent on repetitive tasks.
- Proactively identified areas for process improvement, implementing changes that led to significant time savings for team.
- Delivered exceptional client support by promptly addressing concerns and implementing requested changes or enhancements to software solutions.
- Spearheaded adoption of modern programming practices, promoting continuous improvement in development processes.
- Checked client code for bugs and weaknesses using approved troubleshooting methods.
- Stayed current on industry trends, incorporating emerging technologies into new projects when appropriate.
- Introduced automation tools for efficient deployment processes, minimizing downtime during updates.
- Collaborated with cross-functional teams to design innovative software solutions.
- Updated job knowledge by studying state-of-art development tools and programming techniques and participating in educational opportunities.
- Practiced and encouraged respectful and transparent communication in interactions.
- Contributed valuable insights during product planning sessions, aligning technical strategy with business objectives.
- Implemented robust security measures to protect sensitive data and ensure system integrity.
- Analyzed proposed technical solutions based on customer requirements.
- Collaborated with management, internal and development partners regarding software application design status and project progress.
- Delivered unit-tested systems within customer-prescribed timeframes.
- Conducted regression testing and submitted observations to development team.
- Developed robust, scalable, modular, and API-centric infrastructures.

LEAD SOFTWARE ENGINEER | 06/2021 to 01/2022
MediQ Pvt Ltd - Islamabad, BA

- Performed code reviews to ensure quality standards were met by development teams
- Increase users by 50% by giving technical support
- Developed and implemented software solutions for various business needs using Node.JS, Laravel, and AWS technologies
- Led software development initiative as subject matter expert and primary point-of-contact for project management staff
- Mentored newly hired software engineers through routine coaching and training opportunities
- Provided technical guidance to junior developers on best practices in software engineering

- Managed multiple projects simultaneously while meeting tight deadlines
- Designed, developed, tested, and deployed high-quality applications utilizing Agile methodology
- Utilized version control systems such as Git for tracking changes in source code over time
- Reviewed software documentation to maintain adherence to industry standards and prevent discrepancies
- Developed high-quality, scalable APIs using Python, Django and PostgreSQL
- Optimized database queries and stored procedures for improved performance of web applications
- Automated system tasks using scripts and support tools
- Developed and directed software system testing and validation procedures
- Analyzed system logs for troubleshooting production issues promptly.
- Worked collaboratively with stakeholders to resolve technical roadblocks.
- Led a team of software engineers to successfully complete projects within deadlines, ensuring high-quality end products.

SENIOR SOFTWARE DEVELOPER | 10/2020 to 05/2021
Allomate Solution - Lahore, PB

- Configured development environments utilizing virtual machines on cloud platforms like AWS or Azure
- Increased sales by 30%
- Created detailed documentation related to design decisions, implementation strategies, and usage instructions
- Monitored application performance metrics to identify potential bottlenecks or areas of improvement.
- Monitored ongoing operation of assigned programs and responded to problems by diagnosing and correcting logic and coding errors
- Developed databases, programs, and processes for integration and implementation across the enterprise
- Met with stakeholders to provide detailed project reports and milestone updates
- Coordinated efficient large-scale software deployments
- Delivered high-quality code on time by effectively managing project timelines and prioritizing tasks accordingly.
- Collaborated with cross-functional teams to integrate software components seamlessly into existing systems.
- Contributed to the architecture design of complex software systems, ensuring scalability and maintainability.
- Trained new developers and programmers on company standards for design and review.
- Stayed current with industry trends, applying emerging technologies to enhance product offerings when appropriate.
- Conducted comprehensive code reviews, ensuring adherence to established coding standards and improving overall code quality.
- Provided technical support using knowledge of complex technology to solve problems and support new projects.
- Supervised work of programmers, designers and technicians, assigned tasks and monitored performance against targets.

JUNIOR WEB DEVELOPER | 02/2017 to 09/2020
3s Solutions - Lahore, PB

- Developed and maintained web applications using HTML, CSS, JavaScript, and jQuery
- Developed custom websites to meet individual client needs
- Created clean, well-documented custom code and updates.
- Planned website development, converting mockups into usable web presence with HTML, JavaScript, AJAX, and JSON coding

- Coded websites using HTML, CSS, JavaScript, and jQuery languages
- Oversaw technical issues and troubleshooting requests to resolve user problems
- Validated third-party code to comply with internal standards and technical requirements
- Applied emerging technologies to update and maintain site applicability
- Developed technical solutions required to accommodate specific user-facing assets
- Built website interfaces with HTML and CSS.
- Developed page layouts and navigation tools that met or exceeded user expectations.
- Developed aesthetically pleasing websites through the use of HTML, CSS, and responsive design principles.
- Assisted in the creation of web applications using PHP frameworks such as Laravel for streamlined development processes.
- Applied emerging technologies to update and maintain site applicability.
- Conducted thorough testing of web applications to ensure optimal performance across multiple browsers and devices.
- Utilized version control systems such as Git to maintain organized code repositories and facilitate team collaboration.

EDUCATION

Preston University - Lahore, Punjab, Pakistan | Bachelor of Business & Information Technology
Computer Science, 01/2014

Quaid-e-Azam College - Lahore, Punjab, Pakistan | Intermediate in Computer Science
Information Technology, 01/2010

MQ Foundation - Lahore, Punjab, Pakistan | Secondary Education (Private)
06/2007
